

IALEIA

Introduction to SQL and Applications in Law Enforcement

Monday 18 November, 2024
10:00–11:30 AM CST
Elgin Police Department
151 Douglas Ave., Elgin IL 60120

Learn the fundamentals of writing SQL queries to extract information from databases, which can help you obtain a wealth of information in a short amount of time.

This seminar will focus on practical applications in a law enforcement environment. Find out how SQL can be used to query data for CompStat reports, perform complex link analyses, and sleuth through case records to support investigations.
